

HMI Devices

- LED Indicators and Mechanical Switches are a leading HMI for industrial applications, and Atmel AVR® and AT91SAM microcontrollers offer a variety of benefits.
- Capacitive Touch Technology for HMI helps protect industrial interface modules, while increasing design flexibility and enhancing look and feel.
- Industrial Control Panels with LCD Displays provide the operator an efficient, flexible way to monitor and control increasingly complex automated processes.
- [Hardware Security Products](#) protect firmware integrity from tampering to assure continuous and reliable performance.
